## Pot Pourri

When I have heard small talk about great men, I climb to bed; light my two candles; then

Consider what was said; and put aside What Such-one remarked and some one else replied.

They have spoken lightly of my foolish friends (Lamps for my ghosts, hands guiding where I stumble)

Quoting for shallow, conversational ends, What Shelley shrieked, what Blake once wildly muttered . . .

How can they use such names and be not humble? I have not silent; angry at what they uttered.

The dead bequeathed their life; the dead have said What these can only memorize and humble.

"Grandeur of Ghosts" by Seidreid Sassoon.

There are forty-old fancy words that mean "drunk," but only one that means "sober."

A biologist writes that "pigs when they are deprived of what they want, are very like some men."—Did we need a biologist to tell us that?

Twelve of the twenty-four most important ports in the world are in Europe. Liverpool, London, Bordeaux, Marseilles, Hamburg, Antwerp, Genoa, Hull, Manchester, Bremen and Glasgow.

## CARSELAND

The Free-Press managed to balance up their games with a win on the Mossleigh ice, the score 4-1.

The less said about the senior team's game with Cheshire, the better. The senior to be paying in a visit the latest victims being G. B. Field and W. Giles. Both are improving.

We regret to report the death of one who has been long resident in this community.

(Hans Christian) Chris Hansen passed away in Calgary after an operation following a very brief illness.

Mr. Hansen was born in Iowa and came to Canada in 1910. He served overseas in 1917-18.

He is survived by his wife and three children, Billy, Jerry and Myra, a brother in Calgary, his father in Minnesota and a sister in Iowa also survive him.

Funeral services took place at the Park Memorial Parlors in Calgary on Thursday last, Rev. P. Forster officiating. At the service Miss Lena Dick sang "One Swallow Means Spring" and Mrs. Olsen sang and Mrs. Forster sang. "Then Sometime We'll Understand."

Leland Phillips is home again and is improving rapidly after his operation.

Dick Barker is in a Calgary hospital undergoing an operation and we trust he will soon be around again.

## CHRISTIAN SCIENCE

At all Christian Science Churches next Sunday, the subject of the Lesson-Sermon will be "Soul." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Ye shall keep my sabbaths and reverence my sanctuary; I am the Lord. . . And I will set my tabernacle among you; and my soul shall not abhor you. And I will walk among you, and shall be your God, and ye shall be my people" (Leviticus 26:2, 11, 12).

One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 120): "Soul, or Spirit, is God, unchangeable and eternal; and man coexists with and reflects Soul. God, for man is God's image."

IMPROVED SEED READY FOR ALBERTA FARMERS

Improved seed is being made available to farmers in Alberta municipalities under arrangements between the Dominion and Provincial governments. This seed is pure in its variety and cleaned to a high standard. Seed will be loaded in well cleaned cars in bulk and elevator companies will assist the government in weighing and recording at unloading points without charge. These elevator companies will also pay 1 1/2 cents over street price on any grain delivered under this policy in exchange for field inspection seed. Grain producers who are anxious to improve their seed should look into this exchange policy. Alberta Food Elevator agents will be glad to explain it to anyone interested.

—The Budget

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The Overworked Man and the Woman of the House who get no sleep at night, it is the bile and the liver that are the cause of it. It is just decay in the liver. This decay is not a disease. You get constipated, flatulent, sick and the worst looks appear.

A new liver movement is going on at the moment. You are not sleeping that is the cause of it. It is the bile and the liver that are the cause of it. It is just decay in the liver. This decay is not a disease. You get constipated, flatulent, sick and the worst looks appear.

With an increase in assets of over twenty million dollars in 1936 and a grand total of more than seven hundred and seventy million dollars, the highest in the Company's history, the Annual Report of the Sun Life Assurance Company of Canada recently released by Arthur B. Wood, President and Managing Director, reveals a statement which is one of the bright spots of the insurance and financial world.

Perhaps the best illustration of Sun Life's growth is told in this table:

| Insurance          | Income         | Assets         |
|--------------------|----------------|----------------|
| 1936—2,775,949,287 | 264,063,295.82 | 777,803,533.07 |
| 1935—2,293,849,570 | 78,972,906.39  | 345,251,711.66 |
| 1934—2,087,687,733 | 18,498,123.82  | 82,944,596.06  |
| 1933—1,925,566,239 | 6,212,615.02   | 24,292,692.67  |

ROCKYFORD

BURNS' NIGHT AT ROCKYFORD

Because of the extreme cold and bitter winds the attendance at the Burns' Night Concert and Dance at Rockyford, was not as large as usual, but the enjoyment of those who were present lacked nothing, and everyone reported it the best time ever.

The honored Haggis was brought in to the banquet hall by Happy Regan to the accompanying skill of music from the bagpipes, piped by Mr. McKenzie. Mr. Regan also proposed the toast to the "fringe" in inimitable style, and all said tribute to the time honored "Dink."

Pinky Sullivan, only 8 years old, pupil of the Alice Murchick School of dancing delighted all with her very clever dancing of the Sword Dance, Irish jig and 4 or 5 tap dances.

Good music for the dance was furnished by the Everstate 6 piece orchestra of Calgary.

FROM MILK RIVER TO NEW ORLEANS BY CANOE

Albert Trochtrup, 22, of Julesburg, Colo. tied up his kayak at New Orleans on February 1, after a 3,500 mile seven-month trip by water from Milk River, Alberta. He said that the trip mostly for the exercise. Traveling from the Milk river to the Missouri, and then to the Mississippi, he said he averaged about 30 miles a day paddling with the current. He started the trip last July 1. Trochtrup passed through the upper reaches of the Mississippi before the present flood stages were reached.

Office Boy (nervously). Please sir, I think you're wanted on the phone.

Employee—You think. What's the good of thinking?

Office Boy—Well, sir, the voice at the other end said Hello, is that you, you old idiot?

### A PRESENT DANGER

Canada faces the perils of the days right now. A well informed Ottawa newspaper correspondent says that public men of all parties are seized with the fatalism of the moment. Along one fork of the pathway seem seemingly lies an easy road of selfish sectionalism leading towards division. Along the other fork of the road a rougher highway lies, leading to a greater and more cooperative nation.

Immense problems confront Canada. Her people, as a mass, do not clearly discern them. Each province is obsessed with its own burden of troubles and the nation has within its boundaries various groupings whose objectives tend towards further disintegration. Canada is falling apart.

Now is the time for statesmen to emerge. Such times as these demand the services of men who consider the welfare of their country above that of party or of self. We do not believe that Canada will be altogether lacking in this respect.

If Canada is to survive as a nation it must overcome all tendencies towards disunion and must create a national spirit similar to that which existed during the years of the great war. If the Dominion is split into fragments by factional strife the future of our country will be indeed pitiable compared to the glorious destiny that may be achieved by an united Canada.

There is a place for party strife. That is part of the democratic system of government. But when carried beyond limits danger develops. Playing upon the wrongs of certain sections in order that a measure of prestige might be gained is indeed dangerous.

It is well that all of our people should know and understand the situation. Every statesman, every leader, every newspaper, every politician, every minister, every school teacher, every individual in a position of authority, no matter how slight should be obsessed with the present danger and do everything possible to educate the people how to avoid it. —Brooks Bulletin.

### THE TRUTH ABOUT

#### CANUS WHEAT

The Department of Field Crops, University of Alberta, has issued a bulletin entitled, "The Truth About Canus Wheat." This bulletin says the department is not yet recommending Canus but continuing experimentation by allowing seed to farmers in relatively dry areas of the province. If the 1937 results are entirely satisfactory it will be more widely distributed in the dry sections of the open plains in 1938. Farmers are warned against "glowing accounts of the merits of Canus wheat which have appeared in the Canadian and American press," it comments, "Canus proved to be highly resistant to the strains of the striking smut organism commonly found in Canada; it displayed some resistance to certain forms of rust and appeared to possess a moderate degree of drought resistance. —The Budget.

Hubby—The bank has returned that check.

Wife—Isn't that splendid! What will we buy with it this time?

### ARDENODE

Friends of Mrs. P. E. Sarsons will be pleased to know she has returned home, and is feeling very much improved in health.

Mr. H. G. Smith has returned home after spending two weeks in the city, part of the time had to be spent in bed, owing to a dose of flu.

Mrs. A. Watson spent last week in Calgary visiting with her mother Mrs. Saunders.

Mr. D. S. Brook is now recuperating after his attack of the flu.

The roads in this district are almost impassable. Anyone wishing to travel this way needs a good shovel, and lots of humor and above all a strong arm.

## THE WORLD OF WHEAT

By H. G. L. Strange

Director, Research Department,  
Beattie Grain Company, Ltd.

Duties set up against Canadian wheat by foreign countries are coming down.

France, Germany, Italy, Holland, Belgium, Switzerland, Norway and Sweden, all recently have either actually reduced tariffs against Canadian and other export wheats, or are considering doing so.

This is most welcome news, but it is exactly what could be expected at this time, and which actually was forecasted several years ago by some persons.

History reveals that the economic events which happen after a great war always occur in about the same sequence. After the boom—the natural consequence of a great war—the inevitable comes a depression. During the depression countries try to produce and manufacture, at home, goods and commodities which hitherto they had imported from their neighbors.

This policy of "Nationalism" or "Self-Sufficiency" continues for a few years, then the realization sharply

comes that as imports are curtailed, so exports going out of any country are correspondingly reduced. As soon as this is recognized, economic sanity returns, and countries begin to reduce their tariffs.

Next will come the tearing down of other restrictions against international trade and commerce, such as quotas, barrier arrangements, depreciation of money and so forth.

Meanwhile Canada will sell her wheat more easily.

Following factors have tended to raise price—Indian crops beginning to deteriorate as Monsoon falls to arrive—Belgium, Germany and Holland buy Argentine oats and barley—Rye exports temporarily suspended by Poland—Germany puts margarine, butter, lard and other fats on ration basis from January 1st—Expect greater demand for Manchurian Soy beans from Germany and Japan this year.

Following factors have tended to lower price—First acreage estimates of winter wheat for 1937 harvest indicate increases over 1936—Confirmation that the Japanese rice crop is a most a record. Estimated Argentine

## ONE BILLION DOLLARS

PAID OUT IN BENEFITS BY  
SUN LIFE OF CANADA

SINCE FIRST POLICY WAS ISSUED IN 1871

SECURITY SERVICE

WORLD WIDE

**Another Milestone of Achievement**  
In public service has been passed by the Company during 1936. Of the many significant features of the Annual Report, perhaps the most striking is that during sixty-six years of operation the Sun Life of Canada has paid in benefits to its policyholders and beneficiaries more than One Billion Dollars.

**Features of 1936**  
**ASSURANCES IN FORCE**—The increase in assurances in force reflects the improvement in general business conditions.

**INTEREST RATE** earned on the Company's investments again increased.

**ASSETS** of the Company increased by seventy million dollars in 1936 and are now seven hundred and twenty-seven million dollars, the highest in the Company's history.

**Dividends to Policyholders**  
Participating policyholders will share in the Company's progress by increased dividend payments during 1937.

**ASSURANCES IN FORCE, December 31, 1936** — \$4,715,848,587  
**HOW ASSURANCES PAID FOR** — \$29,586,577

**INCOME** — 164,283,286  
**DIVIDENDS** — 102,254,286  
**EXCESS OF INCOME OVER DISBURSEMENTS** — 60,000,738

**PAYMENTS TO POLICYHOLDERS AND BENEFICIARIES**  
During the year ended December 31, 1936 — \$1,459,209  
Since organization — \$1,046,794,081

**ASSETS**  
**LIABILITIES**  
**PAID UP CAPITAL** — \$1,000,000  
**RESERVE** — \$1,000,000  
**CONFIDENTIALITY** — \$1,000,000  
**SURPLUS** — \$1,000,000

Securities are carried in the balance sheet at book value which in the aggregate does not exceed the paid-up capital.

## CHEADLE

At the annual meeting of the state  
board of directors of the Cheadle  
School District held January 20th, Mr.  
P. Cramer and R. Russell were elected  
to fill vacancies on the school board.

Due to the extreme cold weather  
and poor condition of the roads, the  
card parties put on by the Ladies  
club were postponed.

Boy Cramer who has been attend-  
ing school in Calgary has been home  
for some time due to illness. We are  
glad to report that he is well on the  
way to recovery.

The Cheadle team defeated Cars-  
land 4-1 Wednesday last in a fast hockey  
game.

Miss Lydia McLean is confined to  
bed with a bad cold.

Miss Margaret Kilnes left Thurs-  
day to enter training in the Holy  
Cross Hospital.

The Sports Club dance will be held  
Friday evening February 12th. Every-  
body come and enjoy a good dance to  
good music.

## ROCKYFORD

Mr. J. Hunge spent several days of  
last week in Edmonton attending the  
Trustees convention.

are ill with the flu.

We are pleased to hear that Mr.  
Bill Rind who is a patient in the  
Holy Cross hospital is progressing  
favorably.

Mr. and Mrs. F. Birt had their  
honeymoon recently Mrs. Birt of  
Calgary.

On Sunday Mr. and Mrs. W. Gibson  
entertained at a dinner party in hon-  
or of Mrs. W. Gibson's parents, Mr.  
and Mrs. R. L. Stone, who were cele-  
brating their 24th wedding anniversary.  
Covers were laid for 12 guests.  
During the evening bridge was played.

ENGLISH C. W. S. BUSINESS  
MILLION A WEEK OVER 1935  
Manchester, England—The year  
1936 will long be remembered for the  
million as the year in which there  
were three kings.

But in the cooperative movement  
it will be remembered as the year in  
which a quarter of a million new  
members joined the ranks of the British  
co-operatives, boosting membership  
to 7,500,000; the Co-operative  
Wholesale Society increased its business  
a million dollars a week over  
sales for 1935 passing its Ten Year  
Plan quota of \$500,000,000 by more  
than \$7,000,000; retail co-operative  
business was estimated to exceed  
\$1,000,000,000 and co-operative pro-  
duction by consumers' societies ex-  
ceeded \$175,000,000, showing a gain  
of almost 10 per cent.

\$10,000,000 Building Program  
Encouraged by the success to date  
of the Ten Year Plan which will be  
completed in 1944 with the Rochdale  
Centennial, the C. W. S. has launched  
a tremendous building program. Plans  
being completed by the 76 members  
of the architects' department of the  
C. W. S. call for the expenditure of  
\$10,000,000 for construction at the  
Baildon Street Headquarters in Man-  
chester and equally pretentious pro-  
jects in other sections of the country.

Editor—You've come to the wrong  
person. Ask some of our sub-  
scribers.

It is the only paper in the world that is published every day, except on Sundays and public holidays. It is the only paper that is published in 100 languages. It is the only paper that is published in 100 countries. It is the only paper that is published in 100 cities. It is the only paper that is published in 100 towns. It is the only paper that is published in 100 villages. It is the only paper that is published in 100 hamlets. It is the only paper that is published in 100 parishes. It is the only paper that is published in 100 dioceses. It is the only paper that is published in 100 archdioceses. It is the only paper that is published in 100 provinces. It is the only paper that is published in 100 kingdoms. It is the only paper that is published in 100 empires. It is the only paper that is published in 100 republics. It is the only paper that is published in 100 commonwealths. It is the only paper that is published in 100 confederations. It is the only paper that is published in 100 unions. It is the only paper that is published in 100 leagues. It is the only paper that is published in 100 guilds. It is the only paper that is published in 100 fraternities. It is the only paper that is published in 100 brotherhoods. It is the only paper that is published in 100 associations. It is the only paper that is published in 100 societies. It is the only paper that is published in 100 clubs. It is the only paper that is published in 100 organizations. It is the only paper that is published in 100 institutions. It is the only paper that is published in 100 establishments. It is the only paper that is published in 100 enterprises. It is the only paper that is published in 100 businesses. It is the only paper that is published in 100 industries. It is the only paper that is published in 100 professions. It is the only paper that is published in 100 occupations. It is the only paper that is published in 100 vocations. It is the only paper that is published in 100 careers. It is the only paper that is published in 100 paths. It is the only paper that is published in 100 ways. It is the only paper that is published in 100 means. It is the only paper that is published in 100 methods. It is the only paper that is published in 100 systems. It is the only paper that is published in 100 plans. It is the only paper that is published in 100 programs. It is the only paper that is published in 100 projects. It is the only paper that is published in 100 schemes. It is the only paper that is published in 100 designs. It is the only paper that is published in 100 models. It is the only paper that is published in 100 patterns. It is the only paper that is published in 100 forms. It is the only paper that is published in 100 shapes. It is the only paper that is published in 100 sizes. It is the only paper that is published in 100 colors. It is the only paper that is published in 100 textures. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds. It is the only paper that is published in 100 mixtures. It is the only paper that is published in 100 blends. It is the only paper that is published in 100 alloys. It is the only paper that is published in 100 composites. It is the only paper that is published in 100 materials. It is the only paper that is published in 100 substances. It is the only paper that is published in 100 elements. It is the only paper that is published in 100 compounds.
